

# >\_ Client Brief

## Assemble the Team

---

### Scope of Work:

- I am a well-to-do billionaire who wants to create a team of super heroes to help save the world from an inevitable alien invasion, but first I need to do some research.

### Requirements

- Use SuperHero API (<http://superheroapi.com/>)
- User should be able to search for any comic book character (Marvel, DC, etc.)
- User should be able to save their roster of 5 characters to firebase
- User should be able to compare teams against other users' saved teams
- There are 6 different power levels to compare against(intelligence, strength, speed, durability, power, combat), so each battle between rosters will be based on one power level per battle, on a random basis
- Create a scenario for each power level to give context to WHY they would be fighting using
- Each roster will display their win/loss ratio

### Deadline:

- Wireframes by Wednesday
- Beta by Friday
- Final by the following Wednesday

### Deliverables:

- Project up on GitHub
- Project live at URL (can be gh-pages URL)
